GRAB SPECIALIST

DEVELOPMENT OF HIGH-TECH GRABS

Shanghai Janus Grab Co., Ltd is a global reputed grab specialist, with more than 30 years experience in grabs design, R&D, and manufacturing. Highly educated professionals in steel structure, hydraulic and electric system make Janus grabs competitive in world-wide markets.

Long-time cooperation with Shanghai Tongji University and Shanghai Maritime University improves Janus grabs quality continuously.

Various high standard kinds of grabs always can satisfy different working conditions by clients' requirements. Janus grab have been used in domestic and overseas ports, bulk carriers, power plants, steel mills, environmental power plants, railway, chemical factory, cement factory, paper mill, dredging and other more than 10 industries. Grabs have been exported to Germany, Greece, the United State, Japan, Russia, Singapore, Indonesia, Mexico, Venezuela, Brazil, Chile, Australia, Malaysia, Vietnam, India, Thailand, Hong Kong, Nigeria, Mauritania and other countries and regions.

Janus grab focuses on development of high-tech grabs like Remote control grab, Motor hydraulic grab, Underwater dredging grab. Remote control grab has been the most popular grab for bulk carriers among ship owners and ports. With stable and excellent performance, remote control grab gets many praises from global customers. Successfully developed Remote Control Orange Peel Grab and Remote Control Timber Grab, which improved loading efficiency greatly. By improvements on hydraulic system and cable reel system, motor hydraulic grab's oil and cable reel system temperature has been effectively controlled, it can ensure grab work for 24 hours without stop. The welded construction has been recognized by Lloyd's. The products have got third party certificates like CCS, ABS, NK, BV, LR, SGS etc.
