

▶▶ MANUFACTURER OF LED AND MARINE LIGHTING

'A COMPANY THAT LIGHT THE WORLD'

'SUNIL ELECOMM' is a high-quality and leading Manufacturer of LED and Marine Lighting established in 1990. The Seoul-based 'SUNIL ELECOMM' have high aspirations of becoming the Global leader in lighting industry. As a constantly-expanding, customer-oriented Manufacturer, 'SUNIL ELECOMM' operate based on trust on their successful working principles and creative thinking.

'SUNIL ELECOMM' products include, but are not limited to:

- Indoor/ Outdoor lights (LED and Fluorescent type)
- Electronic Ballast Fluorescent lamps
- Flood/ Search/ Navigation/ Signal/ Hazardous
- Switch/ Receptable/ Junction box
- R&D equipment

The crucial benefits of switching from fluorescent light to LED light are:

- Energy saving – LED lights require approximately 50% less energy (with higher-end fixtures saving can go as high as 70%)
- Reduced carbon footprint – As an immediate result of the lower power consumption for lighting, less carbon dioxide is generated as byproduct.
- Cost saving – In addition to lower power consumption for lighting purposes, LED bulbs have, in average, 5 times longer operating life than traditional bulbs.
- Reduced maintenance costs – Durability in vibration, temperature and impact compared to conventional lights.
- Better visibility in challenging weather and less glare and eyestrain for crew
- Safer for crew – LED lights are non-toxic and higher lifetime ensures less exposure time in dangerous situations during replacement of bulbs.
