### **HI TECH PRODUCTS**

Sealantern Electronics Co., Ltd. is a Hi-tech enterprise that mainly produces marine electronic products.

Directed by high level technology, Sealantern integrates the R&D and manufacturing, follows the IMO's new regulation and aims the international market to enlarge its productive range and development. We are pursuing a company culture based on the satisfaction of people's demand and excellent production quality. Our manufacturing process strictly follows the quality controlling system and had been approved by the BVQI ISO9001:2000. Promoting the marine products development is Sealantern's eternal pursuit.

For many years, Sealantern unites with the electronics institute of the Chinese Academy of Sciences and the electronics department of Tianjin University, and successfully developed a variety of marine electronic devices, such as the SLT-01C Marine Growth Preventing System, SLT-02A Impressed Current Cathodic Protecting System, SLT-08C Cargo Hold Water Ingress Detecting System, SLT-06A Integrated Monitoring & Alarming System and SLT-09A Dewatering System. Besides, we have developed the Pt100 Temperature Sensor, which is the representative marine instrument of temperature monitoring. It features the advantages of anti high-temperature and anti-vibration. Moreover, our company has developed the SLT-18C Simplified Voyage Data Recorder(S-VDR) according to the regulation of SOLAS Amendment V/20.2.

Sealantern takes advantage of its reliable production quality and excellent performance-price ratio; our products are widely approved and appreciated by domestic and international customers.

- Tightly cooperating with electronics institute of the Chinese Academy of Sciences and electronics department of Tianjin University, Sealantern is full of technical advantages.
- Being strictly abided by ISO9000 standard, all of our products go through a 72-hour high-temperature aging testing. Our production quality is absolutely reliable.
- Excellent equipments and professional staffs ensure excellent and reliable qualities of our products.
- Specialized design ensures our marine products to be good-looking, well-structured and easy to maintain and repair.
- We are equipped with professional maintenance and repairing teams; all of our products are guaranteed for their whole working lives.
