BUTTERFLY VALVES

ISO 9001 & ISO 14001 AND TYPE APPROVAL OF ALL MAJOR CLASS

We'd like to introduce Sejin Valve Korea to you, and located Busan in industrial complex near Gimhae Airport, which manufacture all kinds of Butterfly Valve depending upon your specification requirement such as concentric Butterfly Valve, Double Eccentric and Triple metal seated Butterfly Valve.

In Marine market, Sejin would recommend the seat material for chemical tanker based on Teflon, Crude oil Tanker based on NBR, and product carrier based on Viton. Especially, the seat design concept for Teflon seat is very unique design, which is very flexible back up ring which you have never seen before. Others are also unique feature and function more than existing maker and we have many track records to install the valves on board such as chemical Tankers, product carriers and crude oil tanker.

We are focusing customer's need and solve the problems in the field. Even though one enquiry for one piece valve will be given to us, We'll trust it utmost.

Your concern and support for our company would be highly appreciated.

For your reference, Sejin is awarded by ISO 9001 & ISO 14001 and received the type approval of class society such as ABS, DNV-GL, LR, KR and BV.

For retrofit of Water Ballast Treatment System, we have supplied many concentric type Butterfly valves combined with Pneumatic or Hydraulic Actuator depending upon spec requirement.

For Scrubber of Exhaust Gas Cleaning System, we have supplied many Butterfly valves depending on open loop and Hybrid type such as Concentric type or Double Eccentric type.

In case of open loop type, we have supplied VITON seat due to sulfuric acid while EPDM or TEFLON seat was applied due to caustic soda for Hybrid type.

We'll do our best to manage the high quality of Butterfly valves and utmost our efforts to keep it as mentioned for the satisfaction with our customer.
